

DOUBLE ANTI-FALL ROPE W/SHOCK ABSORBER EN. 1.5MT W/STEEL HOOKS AB.54MM - 47PK

REF: 201060900000047PK

Description:

The double rope fall arrestor is a personal protective equipment against falls from height and complies with the EN 355 standard. The fall arrest system consists of a rope energy absorber (EN 355) attached to the safety belt (EN 361) and connected to the structural anchor point (EN 795). The total length of this subsystem, including the energy absorber, rope, terminals and connectors should not exceed 1.5m.

Anti-fall rope:

Material: Polyester (Kernmantle Rope)
Diameter: Ø 10.5 mm

AZ 022 Hook:

Material: Steel
Finishing: Galvanized zinc
Dimensions: 217 x 112 mm
Opening: 55 mm
Weight: 500 g
Static Force: 20 kN
Lock type: Locking gear
Installation Method: Inseparable

Energy absorber:

Material: Polyamide textile
Dimensions: 200 x 32 x 45 mm

AZ 002 Connector :

Material: Steel
Finishing: Galvanized zinc
Dimensions: 130 x 57 mm
Opening: 19 mm
Weight: 220 g
Static Force: 20 kN
Lock type: Locking gear
Installation Method: Inseparable

Suitable for work in potentially explosive areas.

Manufacturer: PROTEKT
