

DOUBLE FALL ARREST STRAP 1,5M WITH SHOCK ABSORBER WITH ALUMINUM HOOKS - MAXI

REF: 21106034A15MAXICX

Description:

The energy absorber Climax mod. 34-A together with a safety harness, is an indispensable element for a safe fall arrest system. The energy absorber is designed to protect when installing scaffolding, as the design of the Y-shaped securing strap enables the user to be secured to the structure at all.

The Climax connector MAXI is an anchor connector (Class A) made of aluminum. It has fully automatic locking and safety blocking mechanisms. The locking and blocking systems are designed to fully prevent accidental or involuntary unblocking of the connector by forcing users to carry out two consecutive voluntary operations to detach themselves.

Features:

- Energy absorption strap of specific seams.
- The anchoring strap is composed of two black polyester straps 45 mm wide

Size:

Energy absorber: 1.5 m*
Connector: Opening: 110 mm

*also available, 2 m
