

# PROTECTIVE SINGLE LENS GLASSES CLEAR POLYCARBONATE ML 1F - 580-I

REF: 21109000000580ICX

## Description:

The Climax 580 COLOURLESS full spectacle has been designed to provide effective protection against the risk of impact by low-energy, high-velocity particles and are capable of resisting small flying debris such as wood, metal and plastic chips, pieces of twigs and branches from gardening machinery, etc. The speed of the projectiles must be less than 45 m/s. Due to the special design of the goggles, any limitation on the angle of side vision is minimised. The optical neutrality allows extended use without discomfort for the wearer.

## Features:

- The front is clear and composed of a single piece
- The nose pads are stationary, protruding inward from the lens
- The earpieces contain side shields, also manufactured of clear polycarbonate
- Consists of a single panoramic lens made of clear polycarbonate with no corrective or filtering effect
- The lens has a nominal thickness of 2.5 mm and measures 142mmx57mm
- Protection from risk of impact by low-energy velocity particles: F
- Optical class: 1

## Composition:

Polycarbonate

## Colors:

Clear
