

POLYPROPYLENE WELDING HEAD MASK DIN 9-13 OCUL - 405 CPA

REF: 211140000405CPACX

Description:

The Climax 405 CPA welding mask is designed to provide effective protection against the radiation emitted during welding processes, as well as any incandescent particles that may be released during these processes. The mask is made of polypropylene and covers the wearer's face and neck, protecting them from possible burns.

The fastening system consists of a harness with two straps one padded and the other adjustable for comfort and safety.

The viewing window has a 1 mm thick external filter cover made of colorless polycarbonate, which protects the non-actinic filter from particles and impacts. The standard filter is non-actinic filter shade 12, with a wide range of other shades available.

Harness size: 56 - 64 cm

Weight: 430 g.

Composition: Mask: Polypropylene

Available sizes to fit filter:

105 x 50 mm
