

BIZWELD PLUS WELDING MASK - PW65

REF: 30109000000PW65PW

Description:

Welding helmet with auto-darkening technology, which switches from a light to dark state when welding activity begins. The light state is DIN 4; the dark state is adjustable from DIN 9 to DIN 13 using the external button. The response time from light to dark state is 0.04 milliseconds; it returns from dark to light state in 0.03-0.04 seconds. Power is supplied by solar cells with 2 built-in lithium batteries to provide power back-up for longer life. No need for replacement batteries.

Features:

- CE certified
- Adjustment roller for easy mounting
- Auto dimming, switches from light to dark when the welding process starts
- Power from solar cells and two backup lithium batteries
- Superior optical quality LCD filter
- Suitable for use with disposable respirators
- Suitable for a wide range of applications

Composition: Polyethylene / Polypropylene / Nylon

Working time: More than 5000 hours

CE EN 166 (1 S)
EN 175 (F)
EN 379 (4 / 9-13 ; 1/1/2)
