

3M P2 R PARTICULATE FILTERS - 5925

REF: 5411070000376743M

Description:

The 3M 5925 Particulate Filters are P2 R particulate filters that can be used with Series 6000 filters for combined protection against gas and particulates (in conjunction with a 501 filter retainer). These lightweight filters are designed to optimize your field of view

Features:

- P2 R protection against solid and liquid particles
- For use with 3M Series 6000 Gas and Vapor Filters in conjunction with a 501 retainer
- Can be used with any 3M Reusable Mask that features a bayonet-type connection.
- The bayonet-type connection allows the filters to be fitted, providing greater ease of adjustment
- Designed to optimize your field of vision
- Helps you work safely in hazardous environments
