

SPEEDGLAS G5-01 WELDING MASK W/WELDING FILTER G5-01TW

REF: 5411171001856193M

Description:

A welding mask with a specific filter suitable for protecting the user's eyes and face from sparks, spatter, harmful ultraviolet (UV) radiation, and infrared (IR) radiation resulting from certain arc gas welding processes. It also protects against certain airborne contaminants when used with an approved air supply unit.

Features:

- Adjustable airflow distribution
- Mounting system for additional protective accessories
- Flip-up welding mask suitable for grinding
- Task light as an accessory, battery powered 3M Adflo
- Enhanced visibility of the welding spot in the light shade (for both ADF) and variable color in the dark shade (for the G5-01VC filter)
- Hours of powerful illumination provided by the new (optional) mask-mounted Task Light
- Highest respiratory safety ratings for powered air equipment (TH3) and assisted air regulators (B3)
- Protection from radiation, sparks, and splashes with new high coverage mask design
- Six different coverage configurations using mask fittings
